

# North Carolina Division of Public Health Early Hearing Detection and Intervention Program

## Child Health Audiology Consultants:

### What can we do for **YOU?**

Provide audiological consultation and training to families, physicians, and community agencies regarding hearing, hearing loss, and educational planning

Support families after the diagnostic process and into intervention services

Assist with identification of local resources to meet the needs of individual children with hearing loss

Provide basic hearing aid services to assist dispensing audiologists and reduce the stress of traveling for families

Promote public awareness regarding the EHDI program, hearing and communication development
