Hearing Checklist

Does your child:

From birth to 3 months:
- Blink or jump when there is a sudden, loud sound
- Wake up or cry to loud sounds
- Calm down when you speak

From 3 to 6 months:
- Look in the direction of a sound
- Become scared by loud voices
- Notice and enjoy playing with toys that make sounds

From 6 to 9 months:
- Understand easy words like “no”, and “bye”
- Babble: “ma ma ma”, “ba, ba, ba”
- Turn towards soft sounds
- Seem to understand own name

From 9 to 12 months:
- Consistently respond to both soft and loud sounds
- Point to favorite toys and objects when asked
- Repeats different speech sounds (uh-oh, dada)
- Say one or two words

The goal of Louisiana’s newborn hearing screening program is to identify babies with hearing loss and link them with services by six months of age. The program collects information about the hearing screening process as per Act 663 of the 1999 Louisiana Legislature.

Louisiana Department of Health and Hospitals
Office of Public Health

Supported in part by project 1 H61MC 00014 from the Maternal and Child Health program (Title V, Social Security Act), Health Resources and Services Administration, Department of Health and Human Services.
Make a Follow-up Appointment

The hearing screening shows that your baby needs more testing. Remember, only a few babies will have a hearing loss.

There are a number of reasons why your baby did not pass the hearing screening. It could have been:
- fluid in the ear
- noise in the room
- movement of the baby
- an actual hearing loss

Your baby may not have a hearing loss, but the only way to be sure is to keep the follow-up appointment.

Prepare for the Appointment

A pediatric audiologist (hearing specialist) will do a more complete hearing test. It will be helpful if your baby is sleeping during the test. Here are some tips:
1. Try not to let your baby nap just before the appointment.
2. Feeding your baby a few minutes before testing may help to make him sleepy.
3. Bring a blanket and diapers, or anything that will help keep your baby comfortable.

Next Steps

If your baby does have a hearing loss, there are services that provide help along the way. Your audiologist will get you started.
- Get as much information as you can.
- Contact earlySteps, Louisiana’s early intervention system.
- Continue to do what comes naturally—cuddle, talk, smile, love. These are ways you and your baby communicate with each other, and... it’s all about communication!

Steps to a Brighter Future...

...Hearing Screening
before 1 month of age

...Diagnosis
before 3 months of age

...Intervention Services
before 6 months of age

Test early!
