GUIDE BY

EHDI Goals

• Goal 1: All newborns are screened for hearing loss no later than 1 month of age. Goal 2: All infants who do not pass the screening will have a diagnostic hearing evaluation no later than 3 months of age, Goal 3: All infants with a hearing loss are . enrolled in early intervention services no later than 6 months of age.

Newborns and **Their Families**

Provide better outcomes for Michigan . newborns and young children with hearing loss. Research shows that early identification of hearing loss and enrollment in intervention services may lead to significant benefits in childhood development. Language and speech development in infants and children helps them acquire skills that are important to literacy success, which is why hearing screens are so important.

•

Program Outcomes

- Ensure National Goals and Objectives are being met
- Develop needs assessments
- Implement quality improvement strategies In 2015,164 Michigan babies were identified
