

Early Hearing Detection and Intervention Quality Improvement Project

Learning Session

Sunday, February 12 (7:00am-3:30pm)
AAP Headquarters, Elk Grove Village, IL

Learning Session Objectives

- Formulate strategies for developing system change in a practice related to early hearing loss detection and measuring that change.
- Recognize factors that place a child at high risk for hearing loss and ways to identify these factors in patients.
- Determine team members in a practice who are essential to improving the number of patients diagnosed with hearing loss early in life.
